# What are your key takeaways from today's event? **10** Answers

Records records records

Thorough review of contract documents. Effective project programming. Taking of relevant project records.

Contemporaneous critical path

No best method for delay analysis and one should get familiar with the contract. DELAY is simply a matter of fact & the ANALYSIS of DELAY is merely common sense.

Proper planning prevents poor performance

Records, contemporaneous analysis, choose suitable delay analysis

Records to be kept

A lot about the proper way of providing claim bids/arbitration documents and their effect of how-the-court will go

Quality documentation is better than quantity

## What are your key takeaways from today's event? **10** Answers

Records, records, records :) Sounds like contract law v imp. Interesting to hear about covid & force majeure...you will get the time (but not money). Thank you everyone.
